Valued Experience, Innovative Products, Outstanding Results

Since 1979, formliners have been our ONLY business. Consequently, we will make that extra effort to provide you with great attention to detail and high quality engineering, which will guarantee a creative and cost-effective solution for your tilt-up, pre-cast, or cast-in-place projects.

- Recognized as leaders in the industry
- Engineering based
- Technology Driven
- Always looking for new ways to meet changing design demands
- Offer solutions before the sale
- Encourage designers to get us involved early in the process
- Offer endless design possibilities
- Welcome many custom projects
- Use superior materials in manufacturing process

Why Should You Use Formliners?

- Concrete does not have to be plain
- Formliners can create a variety of enhancing, architectural finishes for concrete walls and structures
- Cost-effective solution that will turn noise walls, bridges, and buildings into aesthetically pleasing structures
- Can replicate brick, block, stone, rock, wood, and other finishes
- Real brick finishes

BrickMaster™

Thin Brick Gasket System

Thin brick is a fired clay tile that offers the rich look of a regular brick, but at a fraction of the cost.

- 1/2" to 5/8" thick
- Uniformed-sized bricks in vivid natural colors and pattern combination provide an exceptional medium for artistic architectural expression
- Smart economical choice, sustainable thin brick requires 80% less raw material to produce than a regular brick
- These thin bricks sit halfway in the gasket so that the grout lines reflect the look of a traditional masonry wall

1500 East Chestnut Ave
Santa Ana, California 92701
www.formliners.com
800-547-7760

BrickMaster™

Thin Brick Gasket System

Designed to reproduce a real brick masonry wall using real bricks and the BrickMaster™ gasket system.

Superior Quality & Technology

Single-Use Gasket

- Designed so the brick will sit flat in the cavity to prevent the problems caused from floating bricks
- Fabricated from the highest grade plastic which decreases the brittleness associated with other systems

1500 East Chestnut Ave
Santa Ana, California 92701
www.formliners.com
800-547-7760

BrickMaster™

Thin Brick Gasket System

Designed to reproduce a real brick masonry wall using real bricks and the BrickMaster™ gasket system.

Superior Quality & Technology

Multi-Use Gasket

- For precast applications when high repetition is required
- Manufactured using our proprietary elastomeric urethane formulation which is stronger yet more flexible than any other product on the market
- Provides design adaptability
- Exclusive seal system holds each brick securely
- The need to grind bricks is eliminated as it adjusts to variations in brick size to accommodate most brick manufacturers

FitzLok™

Single-Use Interlocking Seamless Formliner

Newly launched after years of
research and development!

FitzLok™

1500 East Chestnut Ave
Santa Ana, California 92701
www.formliners.com
800-547-7760

FitzLok™

Single-Use Interlocking Seamless Formliner

WITHOUT FitzLok™

- The industry standard for masonry, stone, and block designs were limited to rectangular sheets of formliner that were placed or butted to each other
- Great efforts have been made to minimize the seams at the edges to prevent concrete leakage and butt joints from occurring
- Additional hours of labor were required – sacking, patching, rubbing, and grinding to hide those inevitable seams

1500 East Chestnut Ave
Santa Ana, California 92701
www.formliners.com
800-547-7760

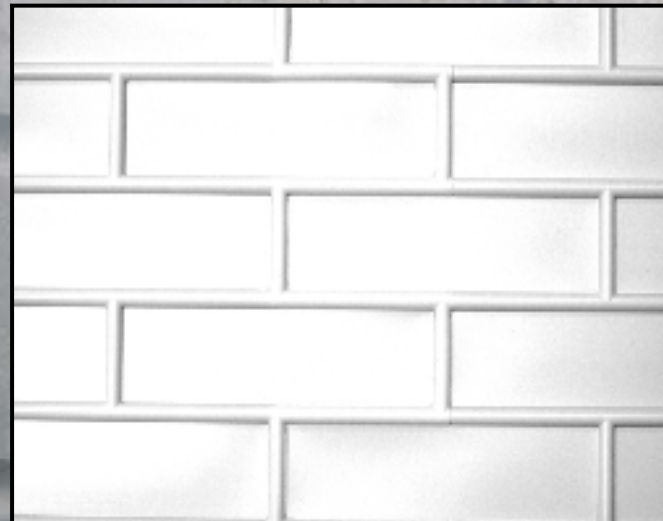

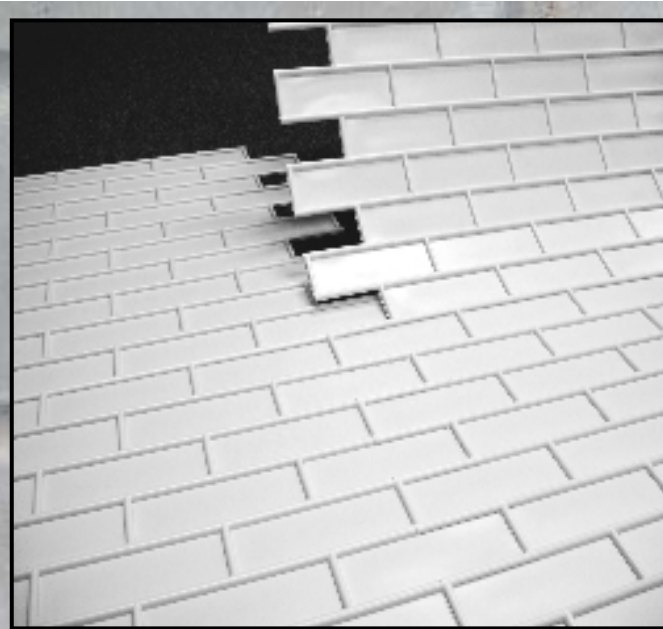

FitzLok™

Single-Use Interlocking Seamless Formliner

WITH FitzLok™

- FitzLok™ is a new patent pending formliner
- Technological breakthrough for formliner panels
- Innovative interlocking system to help produce consistent results
- All FitzLok™ formliners interlock for precise alignment: side-by-side and top-to-bottom, while eliminating seams from showing across the brick face
- Produces high quality architectural finish

1500 East Chestnut Ave
Santa Ana, California 92701
www.formliners.com
800-547-7760

FitzLok™

Single-Use Interlocking Seamless Formliner

Interlocking, single-use plastic formliners provide a seamless, simulated, smooth brick or block masonry finish.

Lower Costs, Higher Profits, Exceptional Quality

- FitzLok™ formliners provides an entirely new outlook on the use of brick and masonry formliner panels
- Provides a superior masonry look while significantly reducing labor costs
- 100% recyclable formliners
- No matter how high or how wide your wall panels are, the end result is always seamless

GrayLastic™

Extended-Use Elastomeric Formliners

Provide maximum design latitude for precast or cast-in-place applications. They are ideally suited for large areas of coverage where extended formliner reuse is likely.

Economy

- GrayLastic formliners may be re-used up to 100 times, making them extremely economical for the right application.
- Also, the aesthetic value of many customer designs can make the return on investment even greater!

Vac-U-Form™

Single-Use or Multi-Use Vacuum-Formed Plastic Formliners

Allow limitless design flexibility for tilt-up or cast-in-place applications. They are ideally suited for small or medium areas of coverage requiring single or multi-use of the liner.

Design Versatility

- Vac-U-Form liners are available in a wide range of standard patterns, including fractured rib, masonry, rope and wood styles
- Custom profiles are welcome

Vac-U-Form™

Single-Use or Multi-Use Vacuum-Formed Plastic Formliners

Allow limitless design flexibility for tilt-up or cast-in-place applications. They are ideally suited for small or medium areas of coverage requiring single or multi-use of the liner.

Material Options

- Single-Use Vac-U-Form — This High-Impact Styrene formliner
- Multi-Use Vac-U-Form — Manufactured from Acrylonitrile-Butadiene Styrene (ABS) plastic formliner and applicable when less reuse is required
 - two grades available:
 - 6 to 8 reuse
 - 10 to 15 reuse
- Standard 4' x 8' and 4' x 10' available

VinyLok™

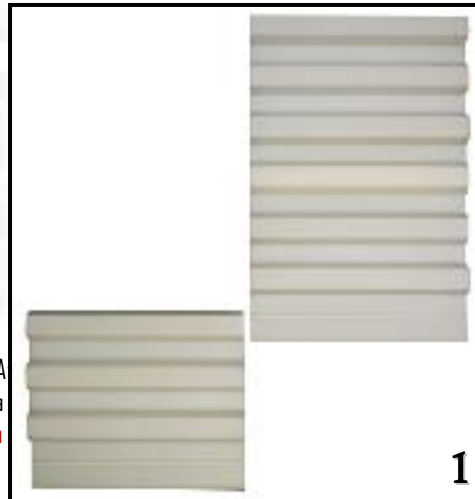

Interlocking Trapezoidal Extruded-Plastic Formliner

Extruded in lengths of up to 40' for use in tilt-up, precast and cast-in-place concrete applications. Their unique interlocking system provides the ideal solution for projects where seamless finishes are required.

Installation is a Snap

- 
- VinyLok comes with an interlocking nailing strip, designed so the contractor may fasten the liner to slab or form and lock the rib over top of the fastener
 - This feature gives the formliner higher re-use and assures a clean concrete finish with no unsightly nail head impressions or grooves

1500 East Chestnut A
Santa Ana, California
